

About Patentability of Innovative Ideas for Products of Mass Production

VADIM ZHMUD

Abstract. The need for innovative ideas for the development of the industry is evident. It is widely known that the patenting of ideas contributes to the protection of copyright in the profit from the sale; however, this issue has its own peculiarities. This paper discusses some of these features and gives examples of innovative ideas, difficult for patenting. The paper gives recommendations on possible ways of overcoming these problems. This article is debatable.

Key words: innovation, patents, patentable, innovative ideas, mirror screen, a matte screen
